I am looking for a Front-End Developer or Full Stack Developer (React-focused) role where I can leverage my 7 years of experience in designing and building responsive, high-performance web applications. I am particularly interested in projects that involve modern JavaScript frameworks—especially ReactJS—and opportunities to work on scalable front-end architectures, performance optimization, and clean UI/UX implementation.

I enjoy collaborating with cross-functional teams, translating complex requirements into intuitive interfaces, and following best practices for maintainable and efficient code. I'm also keen on roles that allow me to explore cloud integration (AWS), basic backend development with Node.js and Express.js, and mobile-oriented solutions using React Native.

Tools and Technologies

- Redux Saga
- Micro Frontends
- Redux Thunk
- Jest
- Cascading Style Sheets (CSS)
- HTML
- JavaScript
- React
- Redux
- Middleware
- React hooks
- SCSS
- TypeScript
- TypeScript JSX (TSX)
- React Testing Library
- React Native
- Express.JS
- MongoDB
- Node.js
- AWS Cloud Practitioner (Basic, <1 y)

Other

- Google Ads (Intermediate, 1 y)

Luxoft

Oct 2024 – Present, Senior Software Engineer

Work from home

United Airlines

- Developed immersive scrolly telling screens with 3D animations
- Worked on native ad creation in Google Ad Manager
- Integrated Betria ma
- Many other functionalities and bugs

Technology:

Animation, Google Ads, HTML, React, react hooks, React Testing Library, SCSS, TypeScript,

GlobalLogic

Jul 2022 – Aug 2024, Senior Software Engineer

Work from home

Disa modernization

DISA Global Solutions specializes in employee screening and compliance solutions, offering a wide range of services to ensure workplace safety and regulatory compliance.

Disa Modernization

- I have written unit testing to increase code coverage.
- This was a maintenance project, so I have fixed many bugs and implemented few new features.
- I have worked on application performance optimization.

Technology:

HTML, React, react hooks, React Testing Library, Redux, Redux Saga, SCSS, TypeScript, TypeScript JSX (TSX)

Jul 2022 – Aug 2024, Senior Software Engineer

Work from home

Sinclair broadcasting

- In this Project I have worked on bug fixes and written unit test case.
- I this project I have written UI automation using selenium WebDriver and jest.
- This project I have written few API end points using node JS.
- I have worked on API automation using jest and postman

Technology:

HTML, React, react hooks, React Testing Library, Redux, Redux Saga, SCSS, TypeScript, TypeScript JSX (TSX)

Publicis Sapient

Nov 2021 – Jul 2022, Associate Technology L2,

Work from home

Verizon

- In this project I have worked on different modules • like creating forms.
- I have created message bus to communicate different applications.
- I have implemented Axios interceptor and few common components.

Technology:

HTML, Micro Frontends, React, React hooks, Redux, Redux Saga, SCSS, TypeScript, TypeScript JSX (TSX)

Xebia It Architect

Nov 2020 – Sept 2021, Consultant

Mumbai

Credit-Card

- I have worked on temporary block, permanent block, unblock features.
- I have worked on generating virtual card.
- I have worked on showing lists of active and inactive credit cards.

Technology:

Jest, React, react hooks, React Native, Redux, Redux Thunk, Unit Testing

Tech ahead Pvt Ltd

Jul 2019 – Nov 2019, Associate Software Engineer

Noida

Erin

I have worked on this project for enhancement. It is an organizational app in which any member of the organization can send referrals to their colleagues

Technology:

Middleware, React, react hooks, React Native, Redux, TypeScript JSX (TSX)

Root Info Solutions

Feb 2018 – Jul 2019, Associate Software Engineer

New Delhi

YESWA

- Yeswa is an ecommerce application.
 - In this application I have worked on customer and vendor module.
 - I have worked on showing list of products.
 - Showing product availability to nearby store on map.
- I have implemented vendor dashboard where vendor can see the purchase details on any products.
- - I have worked on add to cart feature.

Technology:

Cascading Style Sheets (CSS), HTML, React, React Native, Redux Thunk

Language:

Hindi – Proficient

English – Advanced

Education:

2017 APJ Abdul Kalam University Lucknow (AKTU)
Bachelor of Technology, Computer Science and engineering
